

Week 2

Coding in Java Programming Language

INSTRUCTION

1. At the project root, create a directory name "tutorial_2"
2. Change directory to tutorial_2
3. Add the following files
 - 3.1. Main.java
 - 3.2. Student.java

[VISUAL PROJECT REPRESENTATIVE]

your-repository/

ACTIVITY

1. Complete the given modules

Main.java

```
public class Main {
    public static void main(String[] args) {
        // coding starts here;

        Student _____ = new Student(_____, _____, _____);

        s1.displayInfo();
        _____;
        _____;
        _____;
    }
}
```

Student.java

```
// Attributes
class Student {
    String name;
    int age;
    double gpa;

    // Constructor: To store the values from users
    Student(String studentName, int _____, _____ studentGpa) {
        _____ = _____;
        _____ = studentAge;
        gpa = _____;
    }

    // Methods
    public void displayInfo() {
        _____("Name: " + _____);
        _____("Age: " + _____);
        _____("GPA: " + _____);
    }

    // Another Methods
    public void study() {
        System.out.println(name + " is studying.");
    }

    // Yet Another Methods
    public void takeExam() {
        System.out.println(name + " is taking an exam.");
    }
}
```
