

Week 1

Getting Started with Codespaces via GitHub

INSTRUCTION

1. Login/Signup GitHub Account (GitHub.com)
2. At the right top corner, search for "+" symbol
3. Select "New repository"
4. Name your repository using the following arrangement:

YOUR-NAME_object-oriented-programming-tutorials

Example:

NAZMIRUL-IZZAD-NASSIR_object-oriented-programming-tutorials

5. Add README
6. Add .gitignore, select "Java"
7. Add license, select "MIT License" then "Create repository"
8. Select "Codespaces"

Git common command line

1. git init # skip this if already done it before
2. git status
3. git add file_name
4. git commit -m "type your message"
// do the same thing to the rest of the existing file
5. git push

ACTIVITY

1. At the project root, create a directory name "tutorial_1"
2. Inside tutorial_1 directory, create HelloWorld.java & StudentGrade.java
3. Complete the modules.
